MERRICK S. CHANG
Email: mchang23@binghamton.edu

Address:
600 Country Club Rd.
Apt. 3-104
Vestal, NY 13850

Education:

2021 - present **Binghamton University**, Vestal, NY
M.A. in Mathematics in December 2022
Ph.D. in Mathematics expected May 2027
Advisor: Prof. Emmett L. Wyman
Preprint: *Refinements to the Kuznetsov Formula for Laplace-Beltrami Operators* https://arxiv.org/abs/2607.14261 (2026)
Harpur Summer Research Award (2021 - 2023)
Grade Point Average: 3.75

2017 - 2021 **Vassar College**, Poughkeepsie, NY
B.A. with Departmental Honors in Mathematics in June 2021
Grade Point Average: 3.65
Major field of concentration: Mathematics (Grade Point Average: 3.74)
Minor fields (correlate sequences): Computer Science; Physics

Experience:

2025 - present **Teaching Assistant**
Binghamton University, Vestal, NY
Taught sections of Math 147 (Elementary Statistics) for three semesters, from Spring 2025 to Spring 2026. Teaching sections of Math 224 (Differential Calculus) and Math 225 (Integral Calculus) in Fall 2026 semester as instructor of record.

Summer 2022 **Air Force Research Laboratory (AFRL) Scholar**
AFRL Information Directorate, Rome Laboratory, Rome, NY
Proposed and pursued research independently as a Rome Scholar supervised by Dr. Brayden Hollis, Research Computer Scientist and Stratagem Program Director. Wrote code in Java to implement algorithms for artificially intelligent players to use in a zero-sum game.

Summer 2021 **Air Force Research Laboratory (AFRL) Scholar**
AFRL Space Vehicles Directorate, Kirtland Air Force Base, Albuquerque, NM
Worked as a Phillips Scholar Program intern supervised by Dr. Alan Lovell, Research Aerospace Engineer in the Spacecraft Component Technology Branch. Wrote scripts in MATLAB and Python to be used in solving equations for the orbit of a satellite.

Summer 2020 **Undergraduate Research Summer Institute (URSI) Fellow**
Vassar College, Poughkeepsie, NY
Worked on a project supervised by Prof. Luke Hunsberger, Chair of the Computer Science Department. Wrote and tested code in Python to implement algorithms for manipulating temporal networks.

Computer Skills: Proficient in Java, C++, Python, and LaTeX
Literate in MATLAB, HTML5, CSS, Javascript, and Scheme
Experience with R and R Studio, MySQL and SQL queries, Autodesk Maya, Blender, Unity, and Android Studio
